The receipts on the Madison and Indianapolis

In the paragraph yesterday relating to the contract made by the Trustees of the Wabash and Erie Canal, there is a natural error. The paragraph says : " The contractors take the obligations of the Trustees, payable at such dates after the work is completed as will enable them to meet the payments out of the tolls of the canal and the sale of bonds." It should have been sale of lands belonging to the Trust.

The grading of the Terre Haute and Indianapolis (Ind.) Railroad is progressing rapidly. It will be ready for the superstructure next Spring, and, if the iron is received in time, will be completed and in operation by December, 1851.

This Road is a very important link in the great chain of roads connecting New York and Philadelphia with St. Louis.

The whole of this line of roads, with the exception of that across Illinois-commencing at this City, via Philadelphia, Pittsburgh, across the States of Ohio, Indiana and Illinois, and ending at St-Louis-are at the present time either entirely completed and in operation, or in a very forward state of construction, and will be completed at an early day.

Vigorous measures are now being taken to push forward the Illinois part of the line. The citizens of Illinois interested in a direct line from Terre Haute, Ill. to St. Louis, feeling confident that they have the right under the general Railroad law of that State to construct the road, have organized a Company under that law, obtained a subscription to the stock of \$160,000, and paid in ten per cent. and they are now engaged in making a prelimnary "urvey of the line. They commenced at the bluff opposite Terre Haute, and at last accounts had progressed some fourteen miles Westward, finding the line very favorable. The Engineers expect to reach St. Louis by the 20th of November. The peo ple along this line are in fine spirits and are determined to make the road. Wm. S. Wait, Eaqof Greenville is President of this Company.

There has been another Company organized at Alton, Ill. distant some 15 miles from St Louis, for the purpose of construction a road from that point to Terre Haute. They have collected a subscription of \$170,000 to their stock, and have completed a survey of the road from Alton, by the way of Shelbyville and Charleston to the State line, 61 west of Terre Haute. The engineer reports a very favorable line-and it is said that the Company are determined to proceed with the work. There is great confidence now felt at the West that one of these Roads at least will be made, which will insure a direct, and for all practical purposes, almost an air line from the Hudson to the Mississippi.
